Breaking News

SA Health Minister, Dr Zweli Mkhize, has announced the temporary suspension of the J&J vaccination roll-out

This follows a decision taken by the FDA in the USA to temporarily suspend their roll- out of the vaccine based on a possible link between the vaccine and 6 reported cases of clotting.

The Minister stressed that the suspension is a precautionary measure.

It is envisaged that, after a few days, the scientists and regulatory authority (SAHPRA) will be able to ascertain whether there is indeed a vaccine related risk- or not.
